ARUN JARUPULA

London, United Kingdom | 07887 140291 | jarupulaarun2001@gmail.com | http://linkedin.com/in/jarupula-arun-18274724b | http://github.com/arun6309

PROFESSIONAL SUMMARY

Data Science professional with hands-on experience in machine learning and data analysis, supported by industry internship and multiple end-to-end projects. Proven track record of building and optimising predictive models, achieving up to 89% accuracy and delivering measurable business impact. Experienced in handling large datasets, developing data pipelines, and applying statistical techniques to solve complex problems. Proficient in Python, SQL, and data visualisation tools, with a strong foundation in AI and analytics. Adept at translating data insights into actionable outcomes to support decision-making. Seeking a Data Scientist or Data Analyst role to contribute to data-driven innovation.

TECHNICAL SKILLS

Programming & Data Technologies: Python, R, SQL (MySQL, PostgreSQL, SQLite), Data Structures, Algorithms

Machine Learning & AI: Supervised & Unsupervised Learning, Deep Learning, NLP, Generative AI, Model Evaluation, Feature Engineering, Model Optimisation

Data Analysis & Visualisation: Power BI, Tableau, MS SQL, Excel, Data Cleaning, Data Modelling, Exploratory Data Analysis (EDA)

Frameworks & Tools: Flask, Streamlit, Git, Jupyter Notebook

Core Data & AI Concepts: Statistics, Hypothesis Testing, A/B Testing, Probability, Data Pipelines, ETL Processes, Data Warehousing Basics, Model Deployment Concepts

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

WORK EXPERIENCE

Machine Learning & Data Analyst
Cognifyz Technologies | Mar 2024 – May 2024

- **Collected, cleansed, and transformed data** from **multiple sources** (50,000+ records), ensuring **accuracy and consistency**; reduced missing data by 35% using **imputation, encoding, and preprocessing techniques**.
- **Monitored data quality** and identified **anomalies, inconsistencies, and data issues** through validation checks and **exploratory data analysis (EDA)**, improving dataset reliability.
- Designed and trained **regression models** (**Linear Regression, Decision Trees**), achieving an average **R^2 score of 0.85** and improving **predictive accuracy** by 25%.
- **Analysed performance data** and conducted **trend analysis, deep-dives, and root-cause investigations**, enabling **data-driven decision-making** and improving operational efficiency by 15%.
- Performed **model evaluation** using **RMSE and MAE** and applied **hyperparameter tuning** to improve **model generalisation** by 20%.
- Produced **reports, dashboards, and data visualisations** for **stakeholders**, supporting **performance tracking** and business insights.
- Worked with **financial data**, supporting **spend tracking, budget analysis, and performance monitoring** aligned with business goals.
- Automated **data pipelines and workflows** using **Python**, reducing manual effort by 40+ hours/month and increasing **team productivity** by 30%.

PROJECTS

Maternal Health Risk Prediction

- Built classification models (Logistic Regression, Random Forest, SVM) achieving **84.6% accuracy**, identifying key predictors like blood sugar and blood pressure
- Enhanced model robustness by 15% and reduced false negatives by 12% through optimisation and feature engineering.

COVID-19 Socio-economic Analysis

- Analysed 100,000+ records using ANOVA, Chi-square, and regression to identify 5 key socio-economic factors affecting mortality
- Designed SQLite database handling 500,000+ data points, reducing query time by 60% and enabling real-time analysis.

Heart Disease Prediction Using Multimodal Data

- Built ensemble ML model (Random Forest, SVM, Logistic Regression, XGBoost, MLP) achieving **89% accuracy** on 5,000+ patient records and engineered 15+ clinical features
- Applied SHAP for interpretability, identifying top 10 risk factors, reducing false negatives by 18%, and supporting clinical decision-making

CERTIFICATIONS

- Full Stack Data Science & AI – Naresh IT Technologies (2024)
- Python Fundamentals – Great Learning (2024)
- Python for Machine Learning – Simplilearn (2024)
- Data Analytics Foundations & Core – LinkedIn Learning (2024)
- Career Essentials in Data Analysis – Microsoft & LinkedIn (2024)
- Accenture Certified Data Analyst – Centum Foundation (2023)

EDUCATION

MSc Data Science, University of East London, UK
Sep 2024 – Sep 2025

ADDITIONAL INFORMATION

References	**:** Available on request
Relocation	**:** Willing to relocate for the right role
Right to Work	**:** Eligible to work full time in the UK
Sponsorship	**:** Not Required
